USER BENEFITS

- Brad point centring tip:Â This short, pointed tip guides the bit, preventing it from wandering when beginning a cut, ensuring accurate hole placement.
- TCT cutting blades:Â The durable tungsten carbide tipped cutting edges are designed for a long service life and consistently clean, smooth cuts.
- External scribing cutters:Â Two external cutters score the material's surface, preventing splintering and chipping for cleaner edges.
- Flat-bottomed holes:Â The bit's design is optimized to create perfectly flat-bottomed holes, which is essential for properly seating concealed hinges.
- Versatile application:Â It is suitable for drilling in a wide range of wood-based materials, including solid wood, chipboard, plywood, furniture panels, and laminated MDF.
